

# WOOD ACRES

*A Real Estate Letter from Matthew Maury of Stuart & Maury Realtors*

---

---

January, 2024

Dear Wood Acres Area Resident,

There's a wave coming. The next few months are, in my estimation, going to be a very healthy time for the real estate market in our area. 30-year mortgage interest rates peaked at about 7.8% at the beginning of November 2023 and have fallen back to 6.61% as of this early January writing. The Fed seems poised not only to stop raising rates but lower them in the coming year. Consumer confidence is rising significantly over the past two months and there is pent up demand from a relatively slow Fall. Inventory is brutally low (at this writing there are only FOUR single family homes for sale in the entire 20816 zip code and they are all new houses price over \$2,500,000).

Additionally, the S&P Index rose 25% in 2023. Few financial analysts saw that coming a year ago. In fact most "experts" were warning of a recession. Inflation numbers fell from a severe 9.1% in June of 2022 to the Fed's preferred measure of inflation this November of just 2.6%. Unemployment now stands at 3.7%. The last time the United States had unemployment figures this low two years in a row was in the 1960s. Online Holiday shopping was up 6.3% over last year.

These economic figures are facts. Consumer confidence is rising. I have often said that people make large life decisions when they feel comfortable, confident, and more secure. My dad used to use the word "flush." The word "wealthy" is relative, but let's face it, paying over a million dollars for a house qualifies somebody as "wealthy" compared to many in this world. I'm very certain there are a wave of buyers out there ready to make a big life decision. They have had little to look at in the past few months, they were distracted by the Holidays, but they will begin to turn out with a vengeance over the next three months. Stuart & Maury has a new listing on Gloster Rd. for sale at \$1,275,000. It will be "a canary in the mineshaft moment." We'll begin to get a sense of what is to come very shortly.

Why are so few homes for sale? At this early January writing, there are only 56 detached houses for sale in the entire Bethesda/Chevy Chase area. That's historically low. There were many times over the past few decades when that number would have been several hundred. More concerning, there are currently only five homes for sale under a million dollars. And only a total of 15 homes for sale under **\$2,000,000**. That's right, 73% of the homes for sale right now are priced over \$2,000,000. This cannot stand for long. Like, I said, a wave is coming. I think there are going to be smart homeowners who jump the Spring market and come on the market sooner when there is so little for sale. Each listing is going to get a lot of attention. Yes, the flowers and warm breezes of May are appealing but there's more competition too. Something to think about.

One of the reasons so little is for sale is that the "next house" market is struggling. Many homeowners are experiencing the very real phenomenon of "Golden Handcuffs." This very apt expression means that a homeowner has a fantastic interest rate on their current loan in the 2.625 to 3.25% range. They may have ambitions for a larger home but the thought of jumping from their low rate to 6.5% is untenable. And that's understandable. They are "handcuffed" by the exceptional aspects of their current mortgage. So this significant group of potential buyers (and sellers of their current home) are largely on the sidelines. It used to be that many of the homes sold in Wood Acres in a given year involved sellers moving nearby to a larger home in Springfield/Sumner/Kenwood/Chevy Chase/Potomac. Not so much recently!

This is not to say that the "move-up" market has disappeared entirely, but it's certainly nothing like when rates were the lowest in more than 100 years. And this is a reminder that all those buyers who paid what seemed like astronomically high prices from 2020 to mid 2022 were not crazy. They grabbed truly astounding interest rates and plan to be in their homes a very long time. Many Wood Acres owners have opted for the large addition to their homes rather than move as well, driving the "four bedroom-two or three story addition" home in our community ever farther. The very large addition going up at 6108 Welborn Dr. is representative of this trend. And so is the Ned Hengerer/Homestretchers expansion taking place at 5900 Wynnwood Rd. They are, by my careful estimation, the 158th and 159th two or three story additions in the community. That's 40% of Wood Acres.

So who is it that might be selling their home in our area in 2024? There are estates to be settled, people

who retire to more easily managed living quarters such as Sumner Village or Fox Hills out by the Beltway. There are people who move out of town to be nearer their children as they head into their “golden years.” There are sellers who get a job opportunity in another city. There are people no longer tethered to the city they are in with respect to their employment. If the Pandemic taught us anything it is that work doesn’t necessarily have to be done in a downtown office. This unfolding aspect will be the most significant lasting impact of the Pandemic. “Work” and the nature by which it is experienced changed and will continue to change. I worry about the impact of half empty office buildings in downtown DC and even in Bethesda. I am told that the brand new Marriott Building in Bethesda is less than half full. That’s anecdotal but it is suggested that many buildings are experiencing historically high vacancy rates. This will impact everything. The tax base of municipalities nationwide depends on property taxes from these commercial buildings. Local governments are headed for a day of reckoning with a shrinking supply of funds. That impacts schools, roads, infrastructure, social services. I have no good answer but I know this. “Work” at home on a computer is a lot more convenient for many people than slugging out a drive to downtown every morning and back home every evening. Especially for young, successful parents with kids. I’ve had several tell me “I’m never going back to that downtown rat race and if my law firm doesn’t like it I’ll find one that does.”

The real estate result of this view is a heightened emphasis on pleasing work space in the home that has a reasonable degree of privacy. Ideally, that’s a first floor location a bit away from the chaos of the family. If you are contemplating a large addition on your home, creating this space will be a value enhancement in the coming years. The numbers I am hearing for building a three story addition that adds a fourth bedroom and third bath upstairs, a large open family room off the kitchen on the back of the home, and an expanded lower level for the kids are staggering. Entry level cost seems to be nearing \$700K, and soaring to over a million dollars. Can a very basic Wood Acres house add that much and protect it’s value? Well, we’ve had a home sell for \$2,225,000 in this neighborhood, and several more over \$1.8 million. Do it right and you will be creating something with well protected value. If you would like a second set of eyes on your floor plan ambitions and amenities I would be glad to look over your thoughts. Just call me. I see what works in my travels.

### Bethesda/Chevy Chase Data

- Let’s examine inventory. The lack of it is what has held prices firm in our area over the past year and a half. **Only 839 detaches homes were sold in the Bethesda/Chevy Chase zip codes last year.** That’s a 37% drop from the record 1331 in 2021 and 21% fewer than 2022’s 1051 homes sold. I started tabulating this metric 20 years ago. **2023 is the lowest number of sales ever.** Think about it, 379 fewer households sold their home in our area last year. That, my friends, is a lot. I’ve learned over 44 years that ambitions are often delayed but rarely abandoned. While I do think we have a generational shift towards staying in a home longer than decades ago, there are still many homeowners who just didn’t find last year to be the right time to move. But they will eventually, they always do.
- The average price of a single family home in the Bethesda/Chevy Chase zip codes edged slightly higher last year to **\$1,653,082**. While that is a very small increase of less than 1.6%, it IS the highest average price ever. After the accelerant years of 2021-2022 in which prices rose 18% over two years, I consider it a significant win that we were able to hold prices firm. There’s almost always a roll back a bit after a huge increase but that did not happen in 2023.
- The number of days it took to sell a home in 2023 inched up a bit from 20 in 2022 to 28 last year. This increase can be largely attributed to new homes and their peculiar marketing strategies. Sometimes a builder will put a house into MLS before the house has even been built, hoping to capture a buyer early in the process. Thus, a home that is finished and fully ready to be sold and marketed might show months and months of being for sale at a time when most buyers couldn’t visualize how it was going to turn out. Nonetheless, it is fair to say that homes took a little longer to sell in Bethesda/Chevy Chase last year.
- 52 homes sold over \$3,000,000 last year. About the same as the 54 sold the previous year. But...the percentage of \$3,000,000 sales rose from 5 to 6%. And, 25% of the homes currently offered for sale are priced over \$3,000,000. New home builders seem to be going for the “home run.”
- I did another deep dive analysis on what builders were paying to tear down houses during the last four years in our 20816 zip code. There are far fewer tear downs in our area than near the center of Bethesda and near Whitman, but there *were* 28 homes that were sold for tear downs and a successful new home sale then took place since the approximate start of the Pandemic in 2020. The average purchase price for the tear down was \$824K. The average ultimate price for the new home was \$2,293,000. The 28 new home sales represent only 3.5% of the total number of homes sold in the past four years.
- By the way, if you have the sense that “everything” is getting torn down throughout Bethesda, well, not quite! But there were a whopping 332 new homes built and sold in the Bethesda/Chevy Chase zip codes in

the last four years. About 80 a year. Given that 4335 single family homes have been sold in the last four years, the 332 new home sales represent only 7.65% of the market. I know it seems like more but take note that “new homes” in our 20816 zip code are only half the phenomenon that exists throughout the rest of the Bethesda/Chevy Chase area. And obviously, Wood Acres feels none of this. The covenants that prohibit tear downs are utterly unique to Wood Acres. Only a small section of historic Chevy Chase near the circle prohibits tear downs as well. I often tell prospective Wood Acres buyers “the streetscape you see and admire is the streetscape that will endure.” It’s a positive in the minds of many.

- 20.7% of all homes sold in Bethesda/Chase last year were sold over \$2,000,000, a rise from 17% the previous year. And more frighteningly, only 156 homes (18%) were sold under a million dollars. It’s a sign of the times that I used to calculate how many homes were sold OVER a million dollars, now the calculation is UNDER. My how times change.

## 20816 DATA

- The average price of a 20816 detached home ROSE in value 4.1% in 2023 (surprised?). The average home sold for **\$1,555,315 in 2023**. That’s the highest ever of course. Stunningly, only 151 houses sold in the zip code last year. That’s the lowest number in the 25 years I have been tabulating such data. There were 233 homes sold in 2021. Wow. A lot of owners “sheltered in place” in 2023.

- 46% of the homes sold in the 20816 zip code in 2023 were sold over the asking price. That’s down a touch from the astounding 62% that sold over the price in 2021 when prices exploded.
- The high sale in our zip code last year took place on 5216 Abingdon Rd. in Westmoreland Hills. The home sold for \$5,652,000 in 2021 and appears to have undergone a whole house renovation and updating. Whether it was a speculator that purchased the home under the name “Ringside LLC” in 2021 is hard to know. A different LLC purchased the finished product in 2023 for a remarkable \$8,450,000.
- The low sale in the 20816 zip code took place at 5405 Tuscarawas Rd. in Glen Echo Heights. It’s likely either a full scale renovation project or a tear down. The existing house is on topographically challenging lot.
- The home that sold for the most over its asking price 4900 Rockmere Ct. in Sunner, which sold for 275K more than the list price. Abingdon above also holds the distinction for selling for the most OFF it’s \$10,000,000 list price. They took \$1,550,000 less.
- 20816 zip code homes sold in 20 days on average, which is 30% faster than the rest of Bethesda/Chevy Chase. 20816 zip code homes sold for 101.4% of their original list price last year as well, This is right in line with the 101.6% for 20814, 102.8% for 20815 and 101.4% for 20817.

### Average price for a Bethesda/Chevy Chase single family home sales

**2014:** \$1,142,000    **2015:** \$1,151,106    **2016:** \$1,170,138  
**2017:** \$1,185,053    **2018:** \$1,220,928    **2019:** \$1,226,079  
**2020:** \$1,368,233    **2021:** \$1,503,630    **2022:** \$1,625,935  
**2023:** \$1,653,082

## WOOD ACRES DATA

For the 43rd year in a row, let's take a deep dive into Wood Acres sales activity during the past year:

- The average price of a Wood Acres home sale in **2023 was \$1,237,375**. This is down from the lofty average of \$1,333,411 of the previous year but there is an obvious reason. There was only ONE four bedroom home sold last year. There were five "four bedroom" Wood Acres sales in 2022 and four sales at or over \$1,500,000. That heat did not surface in 2023 in Wood Acres. Only one four bedroom home came up for sale. That home at 5906 Ramsgate Rd. had a two story early 2000's Miller addition on it and great square footage at 2391. My humble sense is that this home could have sold for more. It sold for 50K over the modest asking price of \$1,325,000 just 24 hours after coming up for sale. I had it pegged for at least mid \$1.4's, maybe more. But it is fair to say that not every seller wants a bunch of people tromping through their home, and a "sure thing" with a very quick settlement (two weeks) has it's appeal too.
- There were a few modest homes that sold in Wood Acres last year as well, including the saga of 6115 Mass. Ave. which had been in foreclosure and was for sale for years. Literally. I stand in awe of the buyers and their agent that persevered through what I am sure was a tortuous process to actually secure that house. And it's a wonderful house for \$1,000,000 too! So many buyers tried and failed to get through the obstinate out of town lender process over the past few years, somebody finally stuck in there and got it to happen. Congrats to them.
- Wood Acres homes sold on average in five days. And this is because many homes came on the market mid-week with a designation that offers would be considered after the weekend. This was the case with the highest sale in the community last year. 5911 Harwick Rd. was listed for \$1,295,000 and blew up with two offers to \$1,390,000. The home was expertly staged and had been shined up great with new paint and refinished floors and the wall had been taken down between the dining room and the kitchen as well. A truly great three bedroom sale and a fantastic comparable for the community.
- The low sale took place at 6110 Welborn Dr. which sold for \$950,000. It sold in five days. That home had a more modest 1470 sq. ft. but had been spruced up with paint and floor refinishing as well. The basement was unfinished. I wasn't sure how many homes were left with a value under \$1,000,000 in Wood Acres. This was one of them. And there is room to grow there too.
- Wood Acres had only 12 homes sell out of 400 residences. About 3% of the community. We used to average over 20 sales a year in the '90s. As long as inventory remains historically low, prices are very likely not only to remain firm, but continue to rise gently in my estimation.
- You can find full detail on each of the 12 Wood Acres sales in 2023 on the last page of this newsletter.

## Wood Acres Prices 2002-2023

- I also quietly sold 6015 Woodacres Dr. for \$1,320,000 in November. It settled January 8th of 2024. My family lived in this home from 1982 to 1998. We bought the home in 1982 for \$147,500. Interest rates were about 16% and the owner, Mrs. Bamber took a first trust at 11.25% with 20% down. The Bambers were the original owners of the home and bought it new in 1952 for \$26,000. During our time in the home in the '80s and '90s, we added a Homestretchers/Ned Hengerer family room addition on the right side, with a bay window design lifted from those bay windows at the Spring Valley shopping center. I think we may have been

Ned's second Wood Acres client at the time. We finished the basement with an office and powder room as well, and did extensive landscaping. The day I sold a big historic house in Chevy Chase for ...\$315,000 in 1984, was the day we chose to redo our kitchen completely for a whopping 11K. The cabinets are still there and going strong. The long time owners since 2002, Kevin and Linda Berry, headed to San Diego to be closer to family. We'll all miss them, they were great neighbors and loved their time in Wood Acres. The circle of life continues, the new young couple moving in will be great new additions to our community. Say hi if you see them out and about!

## ZIP CODE DATA

- The 20814 zip code experienced a stunning drop in the number of sales in 2023, from 190 in 2022 to only 130 last year. This is a drop of 1/3 in just 12 months. This letter has some valuable institutional data to look back on. The previous lowest number of detached sales in the last 22 years was 2014 when 162 sales took place. Even 2014 had 28% more sales than 2023. Interest rates matter. The high sale in this zip code took place at 7423 Hampden Lane in Edgemoor for \$4,750,000. Take a drive through Edgemoor and you will see huge money being poured into ever larger new homes and massive renovations. It's quite amazing. The average sales price in 20814 last year was \$1,500,017, down 5.1% from the previous year 2022, ...**but...still the second highest yearly average in history.**

- Chevy Chase Maryland is predominantly in the 20815 zip code. It's sales inventory sunk more than 39% from just two years ago. 204 sales took place in 2023, there were 334 sales in 2021. Notice a trend? The high sale was a Kenwood house on Kennedy Dr. for \$6,879,000. The home was sold brand new in March of 2021 for \$5,800,000. And then resold 18 months later for a million dollars+ more than they paid for it. Hemingway famously said "The rich are different than you and me...they have more money."

The average price in Chevy chase dropped from the astounding all time high in 2022, which had rocketed up to \$1,902,552. It fell back to earth ever so slightly this year, falling 6.3% to \$1,775,061. Again, that is still the second highest sales price average ever for the 20815 zip code.

- The **20817** zip code once again posted the highest sale of the year out in Avenel, which barely squeezed into the 20817 zip code at 8913 Holly Leaf Lane, which sold for \$9,185,000. That's got to be the highest sale *ever* in our Bethesda/Chevy Chase area, right? Nope. There have been four homes sell over \$10,000,000 with the highest being way up on a hill overlooking the Potomac River which sold for

\$15,000,000 in the Fall of 2020.

The 20817 zip code average home sold for \$1,663,625 in 2023. That's UP 5.4% from the previous year to an all time record. The lots are bigger out Bradley Blvd and palatial new homes and complete transformation are fueling this year's increase. There were 352 sales last year in this larger geographic zip code, which is down 14% from the previous year and 32% from 2021. The 352 sales last year were the third lowest in the past 22 years.

**Let's end with a discussion regarding four neighborhoods nearby:**

- **Springfield/Westwood** had 16 sales last year, down a touch from 18 in 2022. The average sale price was UP significantly to **\$1,501,766**, the highest ever and very much driven by three huge sales above \$2,000,000. Two of those were complete renovations of existing Springfield homes on Newington Rd (the high sale at \$2,725,000) and a gorgeous renovation expansion as well (\$2,525,000).

Springfield has now had 21 homes sell over \$2,000,000 in its history. The low sale in Springfield last year was on Pollard Rd. for \$955,000.

- In **Sumner/Mass Ave. Hills**, 16 sales occurred at an average price of **\$1,622.833**. Sumner has had 16 homes sales over \$2,000,000 (fewer than Springfield/Westwood). It recorded it's highest sale ever in the past year when a home at 4900 Rockmere Ct. had multiple offers and sold \$305k over the list price for \$3,200,000. The low sale was on Mass. Ave. which sold for \$780,000. Sumner houses sold for 101.5% of their list price last year.

Two years ago **Glen Echo Heights** had 43 sales. They had just 21 in 2023. A precipitous 50% drop in inventory. That community, which is ground zero for tear downs in our zip code had six homes sell over \$2,000,000, including the high sale at 6405 Dahlonga Rd. for \$2,850,000. It was a new home. The average sale last year in this community was **\$1,670,405**. The low sale was also the home that sold for the least I the zip code on Tuscarawas Rd.

- Average prices can get skewered when a community has one house sell for \$8,450,000 and that is what occurred as the high sale in **Westmoreland Hills/Overlook** last year. 13 sales averaged a whopping all time high of **\$2,466,624** even though only three homes sold for that much or more. There was a \$3,300,00 sale on Cape Cod court last year too. The low sale (if you want to call it that !), was \$1,350,000 at 5309 Fal-mouth Rd.

I will say that the "median" sale last year for Westmoreland Hills/Overlook was \$1,850,000, still a huge number and probably more representative.

- Finally the popular condo community of Sumner Village always has remarkable activity and that was the case in 2023 as well. 26 condo units were sold at an average price of \$700,362, with the high sale being \$1,116,000 (the highest sale ever), and the low sale was \$525,000.

In conclusion, I have been told by many of you over the years that you would rather read the personal finish than the data! I get it. This can be a slog. I am very thankful that so many of you have enjoyed this newsletter for decades and find it valuable. The number of owners over the years who say “my dad saved every newsletter you ever wrote” or “we love to read it” or ...” I had no idea that home sold for that much” is reward enough for me.

The VI-Kings, my ‘60s/’70s rock ‘n’ roll band, had a heck of a year in 2023. In no particular order, we played the Warner Theater in August as part of a Tom Petty tribute. What an experience. 900 people on their feet in the middle of the show was a bucket list moment. The VI-Kings also played for 2000 people outdoors at “Sundaes in the Park” in Ocean City. Humanity as far as the eye could see. We played for over 1000 people outdoors at the marvelous Baker Park Pavilion in Frederick in July. The sound system provided was right out of Woodstock. We never sounded better. The best part was looking out on the dance floor and seeing sports reporter Tom Loverro dancing up a storm. The last time I had a moment like that was when I played the Kennedy-Cuomo wedding at Hickory Hill in 1989 and there in front of me dancing were Kitty Carlisle (OK, you can Google her!“ Arnold Schwarzenegger & Maria Shriver.

The VI-Kings also played the Bethesda Urban Partnership Concert Series in early August for hundreds of people outdoors on the closed off Norfolk Avenue. It was great fun and we expect to do it again this year. We just had a series of all time gigs in 2023 that were very rewarding. As a thank you gift to Wood Acres and Springfield, I can tell all of you that we will be performing as we have several times in the driveway at 5804 Searl Terrace again on April 20th, 2024 from 4 to 6 PM. Put it on the calendar and bring a lawn chair or blanket!

Golf? After a hole in one last year, I experienced nothing close to that this year. Parts of my game are good, it’s just hard to know on any given round which part will surface. It’s always something. It’s a confounding game but I enjoy the camaraderie with my old basketball buddies who are all now “golfers” (the term is used loosely) too.

The greatest joy Barb and I have comes from these two little guys. They’re adorable. 3 1/2 year old James is the best big brother you’ll ever find for new addition little Eddie who is now nine months old and about to start crawling. We are so lucky to have them living just around the corner from us on Briley Place in Springfield. We are a big part of their lives. Having grand-kids remind us all that we have a responsibility pass down to them a better world than we received. We’ve got some work to do on that score.

Sincerely,

Matthew Maury
